SUMMARY

Entry-Level Data Analyst with strong skills in Excel, SQL, Power BI, and Python. Experienced in building interactive dashboards, cleaning and analyzing data, and turning business data into actionable insights. Passionate about solving business problems using data and continuously improving analytical and visualization skills.

PROJECTS

Sales Performance Dashboard | Microsoft Excel August 2025 | [View Project](#)

Tools: Microsoft Excel, Pivot Tables, Pivot Charts, Slicers

- Analyzed a sales dataset containing 9,800+ records using Microsoft Excel.
- Built Pivot Tables to analyze key business metrics, including Total Sales, Orders, Customers, Cities, Categories, and Products.
- Created Pivot Charts to visualize monthly sales trends and sales performance across regions, customer segments, and shipping modes.
- Developed an interactive dashboard with Slicers to enable dynamic data exploration and reporting.
- Delivered business insights through sales performance analysis and KPI visualization.

Healthcare Analytics Dashboard | Microsoft Power BI Mar 2025 | [View Project](#)

Tools: Power BI, Power Query, DAX

- Developed an interactive Power BI dashboard to analyze healthcare operational and financial performance.
- Performed data cleaning and transformation using Power Query to prepare the dataset for analysis.
- Designed interactive dashboards to monitor key metrics across Overall Performance, Revenue & Expenses, Appointments, Doctors, and Patients.
- Built dynamic visualizations and KPIs to support operational monitoring and data-driven decision-making.
- Created interactive reports with filtering and drill-down capabilities to explore healthcare performance from multiple perspectives.

Banking Transactions Analytics Dashboard | Microsoft Power BI July 2026 | [View Project](#)

Tools: Power BI, Power Query, DAX

- Analyzed 50,000+ banking transaction records and 5,000 customer records using Power BI.
- Performed data cleaning and transformation using Power Query to prepare the data for analysis.
- Built an interactive dashboard to monitor key business KPIs, including transaction amount, transaction count, fees, taxes, customer activity, and average transaction value.
- Created interactive visualizations to analyze transaction trends, customer segmentation, geographic distribution, transaction channels, and merchant categories.
- Generated business insights and recommendations through exploratory data analysis and KPI reporting.

EDUCATION

Nahda University, Beni Suef, Egypt
Bachelor of [Computer Science], GPA: 3.4 , Graduation: 2026

- Relevant Coursework: Data Analysis, Statistics, Database Systems, Data Mining, Python
- National Telecommunication Institute (NTI)**
Professional Training Program in Data Analysis (Excel, SQL, Power BI, Python)

TECHNICAL SKILLS

- Data Analysis:** Excel, SQL, Power BI, Python
- Data Visualization:** Power BI, Excel Dashboards
- Databases:** SQL Server
- Excel:** Pivot Tables, Power Query, Power Pivot, XLOOKUP, INDEX-MATCH, Advanced Formulas
- Python:** Pandas, NumPy, Matplotlib

Languagees

- Arabic:** Native
- English:** Intermediate
